

The natural light filled kitchen is a joy to prepare meals in. It has ample space for multiple cooks to work together. It is separated from the spacious dining area by only a standard height counter, enabling conversations between the cooks and both family and guests.

The large passageway to the living room and the sliding doors leading out to the back patio add to the open and welcoming ambiance.

Upstairs has four bedrooms and two bathrooms.

The master bedroom has a walk-in closet, a carpeted floor, and a view out over the front common area. Its ensuite bath has a large walk-in shower and a tile floor.

Each of the other three bedrooms are good sized, have views through large sliding windows, and carpeted floors. Two of these bedrooms have a six foot wide sliding-door closet.
