

The beautifully remodeled kitchen features stone countertops with high stone backsplashes, stainless steel appliances, and a bright white open beam ceiling.

Gleaming warm brown cherry hardwood cabinets give the cook and guests the ambiance of a warm luxurious home. The open floorplan and breakfast bar invite everyone to converse during meal preparations.

The open living room dining area is spacious enough to provide separation but still enable interaction between people in the different areas.

The northeast facing wall of glass provides plentiful natural light yet avoids the heat and glare of strong direct sunlight.

The floor to ceiling white brick fireplace provides a warm cozy area during cold cloudy days.
